

Hundley-Whaley Center

2007 Corn Performance Test

Planted: April 9, 2007
Tillage: Minimum
Row Spacing: 30 inches
Soil Type: Grundy silt loam
Fertilizer: 180-60-80 N-P-K

Harvested: Oct. 15, 2007
Planted Population: 28,000 seeds/A
Previous Crop: Soybeans
Soil Test: pH=6.3 P=52 K=210
Herbicide: Bicep (pre) Callisto (post)

** Highest Yielding Hybrid in the trial

* Yield is significantly equal to the highest yielding hybrid
