AGRICULTURAL LIMING MATERIALS REPORT

JANUARY 1 THROUGH JUNE 30, 2001

This bulletin is a detailed report of official samples obtained under the Missouri Agricultural Liming Materials Law collected from January 1 through June 30, 2000. There were 862 official samples collected in this period. All samples are analyzed to determine fineness of grind, calcium carbonate equivalent (CCE), and magnesium content (Mg). Effective neutralizing material (ENM) and effective magnesium (EMg) are calculated from this information, as prescribed by Rule, for each dry sample which meets the minimum specifications of at least 90% passing a U.S. No. 8 sieve and minimum 65% CCE. Products not meeting minimum specifications cannot be sold as agricultural liming materials. Thirty-five deficient samples are reported, which resulted in five "stop sale" order's issued against a producer stockpiles for excessive coarseness. Corrective actions taken by producers have resulted in the release of one issued "stop sale" order from the previous period.

Table 1 lists registered producers and samples obtained at production sites. Table 2 lists samples obtained from retail distributor stockpiles, by producer.
