

**Missouri  
Agricultural Liming  
Materials Report**

**January 1 to June 30, 2015**

**Agricultural Experiment Station**

**University of Missouri-Columbia**

This bulletin is a detailed report of official samples obtained under the Missouri Agricultural Liming Materials Law collected from January 1 through June 30, 2015. There were 620 official samples collected in this period. All samples are analyzed to determine fineness of grind, calcium carbonate equivalent (CCE), and magnesium content (Mg). Effective neutralizing material (ENM) and effective magnesium (EMg) are calculated from this information, as prescribed by Rule, for each dry sample which meets the minimum specifications of at least 90% passing a U.S. No. 8 sieve and minimum 65% CCE. Products not meeting minimum specifications cannot be sold as agricultural liming materials. Twenty-two deficient samples are reported, twenty for excessive coarseness, two for low CCE. There were four "stop sale" order's issued against producer stockpiles for excessive coarseness. One of the Stop Sale Orders from the previous season has been released due to corrective action taken at the quarry. There were no deficient samples reported at distributor stockpile locations.

Table 1 lists registered producers and samples obtained at production sites.  
Table 2 lists samples obtained from retail distributor stockpiles, by producer.

---

MISSOURI AGRICULTURAL LIMING MATERIALS TONNAGE  
REPORTED SINCE AUGUST 13, 1976
