

**Missouri
Agricultural Liming
Materials Report**

July 1 to December 31, 2015

Agricultural Experiment Station

University of Missouri-Columbia

This bulletin is a detailed report of official samples obtained under the Missouri Agricultural Liming Materials Law collected from July 1 through December 31, 2015. There were 766 official samples collected in this period. All samples are analyzed to determine fineness of grind, calcium carbonate equivalent (CCE), and magnesium content (Mg). Effective neutralizing material (ENM) and effective magnesium (EMg) are calculated from this information, as prescribed by Rule, for each dry sample which meets the minimum specifications of at least 90% passing a U.S. No. 8 sieve and minimum 65% CCE. Products not meeting minimum specifications cannot be sold as agricultural liming materials. Thirteen deficient samples are reported, nine for excessive coarseness, four for low CCE. There were eight "stop sale" order's issued against producer stockpiles: 3 for failure to apply for permit to sell ag liming materials, one for low CCE and four for excessive coarseness. Four of the Stop Sale Orders were released due to corrective action taken at the quarry. There were no deficient samples reported at distributor stockpile locations.

Table 1 lists registered producers and samples obtained at production sites.
Table 2 lists samples obtained from retail distributor stockpiles, by producer.
